1. Claims 1-4 are objected to because of the following informalities:

Both claims 3 and 4 are two sentence each where they each should be one sentence.

It is suggested that applicant replace ". **This**" in each claim with ", this"

The word "comprising" would more positively recite the components of the device instead of the word "uses" in claim 1, line 1. Also the utilization of the phrase "with means" before the phrase "to measure human height" in claim 1, line 2, would more positively recite the components. Appropriate correction is required.

2. The abstract of the disclosure is objected to because it has more than 150 words and it should be limited to one paragraph. Correction is required. See MPEP § 608.01(b).

3. The Burgess et al. reference discloses a distance measuring device integrated onto a cap (see column 9, line 5) that produces varying acoustical tones to provide obstacle detection for the visual impaired. The prior art does not disclose means to measure a human's height with an ultrasonic distance sensor and control unit integrated onto a cap.
